
REMOVE MOIST
AIR & ODOURS
FROM BATHROOMS

BATHROOM
Ventilation System

Uses the power of the wind to
constantly ventilate your bathroom

THE TURBOVENTURA TURNS IN THE LIGHTEST OF BREEZES TO EXHAUST AIR FROM BATHROOMS

THE 150MM DIAMETER CEILING REGISTER CAN BE SIMPLY OPENED AND CLOSED TO SUIT CONDITIONS.

BATHROOMS ARE A UNIQUE PROBLEM AREA IN THE HOME

Bathrooms are a constant problem. Odours and moist conditions prevail. The frequent use of showers and baths give rise to humid air which encourages the growth of mould and mildew.

Electric exhaust fans offer some assistance by removing moist air into roof spaces. However these fans typically operate for short periods only. Furthermore, they use energy to operate and can promote condensation problems in roof spaces.

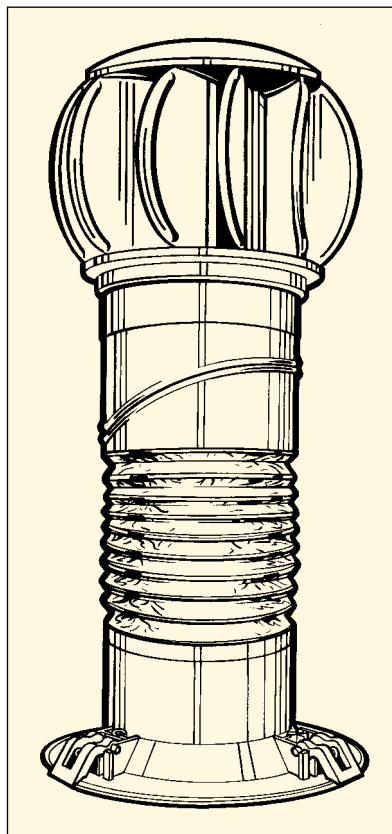

NATURAL VENTILATION PROVIDES A SOLUTION

The Edmonds Natural Ventilation System provides an inexpensive means of constantly removing moist or pungent odours from bathrooms.

The power of the wind is used to drive a roof top ventilator which, in turn, exhausts bathroom air to atmosphere. There are no on-going energy costs or maintenance needs. The air in an average 9m² room is changed approximately five times per hour.

BATHROOM VENTILATION SYSTEM WARRANTY

Edmonds Products (Aust) warrants TurboVentura ventilator when used on domestic premises for 5 years against defects in workmanship, parts, or mechanical failure.

THE COMPLETE SYSTEM TO VENTILATE YOUR BATHROOM

The BATHROOM VENTILATION SYSTEM consists of the following components:

1. A TurboVentura 150mm roof top ventilator, available in brown or white colours.
 2. Three metres of flexible tubing to reach from the ventilator to the bathroom ceiling register.
 3. A 150mm controllable ceiling register.
- The entire product is relatively easy to install and should not require entry into attic area.

The ventilator discreetly fits all major roof types and pitches from 0 to 45°
